Quantum Leap: Implementation Gaps

- Wrong understanding — 100 000 Dollars gone
- Fear of saying something — the problem remains unknown
- Bad communication of the changes in the planning — follow up costs

The plan is one thing — the implementation the other ...

- Why weren't we informed about the problem early on?
- Why did this fail again?
- Why do we have shifts of deadlines, ambiguities and more costs again?

WINPACTA more **WIN** & more **IMPACT**

- Measures the hard and the soft factors systematically
- Optimizes the collaboration
- Uses our **OK-ACCOUNT**[®] to promote development and sustainable success in teams and organizations.

Would you like to know, how the quantum leap works?

We would love to inform you free of charge how you could use the OK-ACCOUNT[®] to optimize your success factors.

WINPACTA Impact Principle

Would you like to recognize the correlations that lead to costly implementation gaps through the different relative views in order to avoid it?

With the WINPACTA Impact Principle

- **you see exactly** where to tackle things
- **you know how** to implement the findings

With this you are able to use the interdependency of the hard and soft factors systematically. You can benefit from this extended dimension of management.

WINPACTA Method with our OK-ACCOUNT®

The innovative and successful WINPACTA method analyzes all relevant factors systematically, shows you the interrelationships and supports you with the implementation in your daily work and with the tracking of the success.

WINPACTA Benefit

With WINPACTA you save costs und achieve more impact:

- Because difficult topics can be recognized and brought up much earlier
- Because there are less misunderstandings that cost a lot
- Because you will see correlations that you didn't see before
- Because you can use the existing potential much better

- **WIN for the company**
- **WIN or all**

Because you know and understand the inner success factors!
